Summary

Frontend developer with several years of experience delivering high-quality web applications for international enterprise teams. Specialized in building performant, pixel-perfect, and responsive user interfaces using modern frameworks. Proven track record of improving page performance, maintaining scalable codebases, and consistently delivering features on time in fast-paced, remote-friendly environments.

Skills

Frontend: Angular, React, TypeScript, JavaScript (ES6+), HTML, SCSS

Backend: NodeJS

Libraries: Redux, React Router, RxJS, Material UI, amCharts

Tools & DevOps: Jenkins, AWS

Collaboration: Jira, Confluence

Testing: Jest, Playwright, React Testing Library

Professional Experience

Frontend Developer

Crescendo Collective

May 2021 - Present

Client: Curriculum Associates (E-Learning Providers) | US-based company

- Served as a key contributor to the development of an automated PowerPoint generation system, reducing report creation time from weeks to minutes and significantly improving operational efficiency
- Contributed to the system from early-stage development through first production release, helping deliver a high-impact, customer-facing solution
- Built and maintained reusable UI component libraries and data visualization tools (charts) used across multiple applications, improving development speed and consistency
- Supported the development of Educator Dashboard and Custom Reporting platforms by leveraging shared components and visualization tools
- Ensured application security and stability by managing dependencies, resolving vulnerabilities, and maintaining up-to-date packages
- Collaborated with QA and cross-functional teams to test, debug, and ensure high-quality releases

Lead Developer

CC.Talent

November 2019 - May 2021

Client: Daisycon (Affiliate Marketing) | EU-based company

- Played a key role in modernizing a legacy system by migrating from AngularJS to Angular (v20+), significantly improving performance, maintainability, and overall user experience
- Led and owned the development of complex features, including a multi-tab WYSIWYG editor for HTML banner ad creation with search, find, and highlight functionality
- Designed and implemented pixel-perfect, responsive dashboards and web interfaces, enhancing usability across devices
- Developed and maintained integrations and plugins for platforms including Shopify, WooCommerce, Magento, and Lightspeed
- Mentored developers and conducted code reviews to improve code quality, readability, and maintainability across the team
- Collaborated with QA and participated in testing efforts to ensure high-quality product delivery

Frontend Developer

XScribe Solutions Inc.

March 2016 - November 2019

- Served as a pioneer developer in building HR and Payroll modules of an ERP system using Angular and TypeScript, contributing to core product development
- Translated business requirements into technical solutions through active participation in client discussions, ensuring accurate and scalable implementations
- Collaborated with QA and participated in functional testing to ensure high-quality, bug-free releases
- Mentored junior developers by guiding them through the codebase and development practices, improving team productivity

Education

Bachelor of Science in Computer Science, *Cum Laude*

Tarlac State University — Philippines

2007 – 2011
